

UNIVERSITY OF BRISTOL SPELAEOLOGICAL SOCIETY

Circular to Members.

Mendip. Much rain has stopped any cave digging, except for Rhino Rift.

On two occasions in December and early January, the water rising at Cheddar was very muddy for no apparent cause. The mud was much more than could have been caused by cavers' activities. A man living near reported a considerable rumbling under his house shortly before the first occasion.

Ireland. A party will be leaving Bristol on July 12, and staying at Ballynalackan until July 30.

A small party will also be going to Ireland on a trip to reconnoitre for new caving areas, from April 13 to 26. Anyone interested should write to Dr. E.K. Tratman at once.

Yorkshire. There will be a combined U.B.S.S./Wessex Cave Club trip to Yorkshire for the Easter week-end - April 20 to 23. Anyone interested should write to Dr. C.C. Lloyd.

February, 1962.
